

# Cassettes

Cassette with Extruded Side Walls

Cassette with four Depth Profiles

Cassette with Cover Hood

Cassette with Heat Sink

# Cassettes

## Description

The cassette has two functions: It can be inserted into a subrack just like a PCB and it can accommodate plug-in boards.

Three cassette versions are available:

1. A cassette with extruded side walls  
Extruded side walls in combination with a front panel and a rear panel make up the basic cassette which is then fitted with top and bottom plates.
2. A cassette with four depth profiles  
Four identical depth profiles in combination with a front panel and a rear panel make up the basic cassette which is then fitted with top and bottom plates. Two side service apertures are created which make the interior of the cassette easily accessible for inspection purposes. These apertures can be closed off using slide-in panels.
3. Cassette with cover hood  
This version consists of an extruded side wall at the left to which the protective cover with an integrated rear wall is attached. The rear has a 4 HP aperture for installing an IEC 60 603-2 type B, C, D or F connector.

The special design features of the cassettes:

- ✓ The side edges of the front panel are slit for insertion of RFI gaskets which harmonically blend into the front panel grid and which require no additional space.
- ✓ The cassettes fit into all IEC 60 297 subracks.

- ✓ The cassette is fitted in the subrack using PCB guide mounts. For the right side of the cassette the guide mount is installed rotated by 180°.

- ✓ Suitable for accommodating Euroboards (3U, 6U) in accordance with IEC 60 297.
- ✓ The side walls and depth profiles have guide channels for insertion of 3U or 6U boards; only installation at the left is standardized.
- ✓ Additional guide mounts can be snapped into the top and bottom cover panels to accommodate internal boards.
- ✓ When used in a subrack the distance between the cassette and the PCB to the right of it is 2.47 mm.

## Rear panel:

Three different rear panels are available:

1. Cassette „RG“ (rear panel closed):  
This cassette is particularly suitable for any installation.
2. Cassette „RT“ (rear panel with partial aperture):  
The rear panel has a 4HP aperture for installation of a connector.
3. Cassette „RV“ (rear panel with full aperture):  
The rear panel has an aperture across its full width and is perforated for installation of connectors.

## Dimensions

The cassette design is based on the following grid:

- Horizontal pitch 5.08 mm
- Height pitch 44.45 mm
- Depth pitch 10.00 mm

## Technical data

Standards	IEC 60297, Part 3
Material	„RV“ rear panel, top and bottom panels: sheet steel mounting parts: steel handles: plastic other parts: aluminum
Finish	side panel, covers, „RV“ rear panel: untreated front panel: front anodized, rear and edges untreated other parts: passivated
Protection class	IP 30
Utilization category	-25 °C to 70 °C, =< 75 % relative humidity, condensation possible
Electrical requirements	all parts are electrically bonded to one another following assembly in accordance with VDE 100 § 8 Nb.

### RFI shielding of Cassettes.

The Cassettes are manufactured from electrically conductive materials and screwed together.

The RFI shielding can be further enhanced by increasing the number of screws used in vulnerable areas to obtain a superior RFI seal:

1. Top and bottom plates / front panels  
Additional mounting blocks can be used between the top and bottom covers and the front plate.  
The top and bottom covers are pierced every 5.08 mm and by drilling extra holes in the front plane, additional contact points can be made.
2. Top and bottom plates / rear panels  
Additional mounting blocks can be used between the top and bottom plates and the rear panels.  
The top and bottom plates are pierced every 5.08 mm

and by drilling extra holes in the rear panel types “R” and “RT”, additional contact points can be made. Rear panel type “RV” are pre-punched at 5.08 mm as standard and require no further modification.

3. 6 U Side wall / front panel  
Two additional screws can be used in the front panel (one each side) to gain extra contact points to the side extrusion. Both the front panel and the extrusion require additional drilling.

Intermas Cassettes have excellent RFI Shielding properties as standard.  
But should you wish to enhance the RFI shielding, then please contact one of our specialists for further assistance.

Please ask your local representative for your  
**personal assistance.**  
You find your contact person on our homepage:

# Cassette with Extruded Side Walls

## Cassette with Extruded Side Walls

The cassette kits includes following rear panels:

1. Rear panel closed (RG)
2. Rear panel with partical aperture (RT)
3. Rear panel with full aperture (RV).

### Kit consists of:

- 2 extruded side walls
- 1 rear panel
- 2 top/bottom plate
- 1 front panel, with slits in the side edges for insertion of RFI gaskets
- 1 handle
- 1 aluminum ident-plate
- Mounting parts

### Delivery

The cassette is delivered unassembled as individual parts or as a kit.

# Cassette with four Depth Profiles

## Cassette with four Depth Profiles

The cassette kits includes following rear panels:

1. Rear panel closed (RG)
2. Rear panel with partial aperture (RT)
3. Rear panel with full aperture (RV).

### Kit consists of:

- 4 depth profiles
- 2 struts
- 2 side plates
- 1 rear panel 3 U / 2 rear panels 6 U
- 2 top/bottom plate
- 1 front panel, with slits in the side edges for insertion of RFI gaskets
- 1 handle
- 1 aluminum ident-plate
- Mounting parts

### Delivery

The cassette is delivered unassembled as individual parts or as a kit.

# Cassette with Heat Sink

## Cassette with Heat Sink

This cassette is designed for passive cooling of electronic sub assemblies and systems. The thermal power loss which is generated in the 19" cassette is dissipated by a heat sink which also serves as sidewall. The heat sink is covered by an asymmetric front panel. Euroboards are being fitted into card guides which can be snapped in every possible position in the cassette. A wide range of accessories, for example rear cover, handle and handle strip in different colors and types are available. The front panel can be fitted with RFI springs to realize RFI shielding of the front of the subrack. Optionally the complete cassette can be RFI shielded.

### Delivery

- 4 depth profiles
- 1 side plates
- 1 heat sink, aluminum blank
- 1 rear panel 3 U
- 2 top/bottom plate
- 1 front panel, with slits in the side edges for insertion of RFI gaskets
- 1 handle
- 1 aluminum ident-plate
- Mounting parts

### Delivery

The cassette is delivered unassembled as individual parts or as a kit.
