

Intermas Packaging Solutions for CompactPCI

Intermas offers 19 Inch system subracks as bases for assembling computers in the industrial field.

The packaging solutions include backplane, power supply, cable harness and air conditioning.

Based on the reliable series subrack *RFI-SHIELDED* Interma guarantees usage of a complete and comprehensive schedule of additional components .

Packaging solutions for CompactPCI are available in 3, 4, 6 and 6+1 U ex stock.

All subracks include a CompactPCI backplane with 8 Slot 64 Bit or 32 Bit. The horizontal installation enclosure is equipped with 4 Slot backplane 64 Bit (according PICMG 2.0).

Additional space for installation of hard disks or other disk drives is part of mechanical design.

Because of redesign of the horizontal installation package mechanical piece parts are decreased and an additional slot for 4 HP 6 U euro board is guaranteed.

Independent of Packaging Solutions ex stock Interma also offers custom specific system for VME, VME64x, CPCI and J1/J2 Monolithic VME. Specify your special requirements with configurator on Interma-Elcom Homepage.
