

### **Intermas-Elcom GmbH and Infotronic Touchscreen Systeme GmbH agree sales cooperation for Kiosk Systems**

Intermas-Elcom GmbH located in Darmstadt and Infotronic Touchscreen Systeme GmbH from Pitten in Lower Austria agreed to a sales cooperation for touchscreen information systems. According to the agreement, from now on Intermas will provide Infotronic kiosk systems.

With this partnership, Intermas - provider of custom industrial PCs - expands its product range by kiosk systems for in- and outdoor applications. Since Infotronic also enables the individual production of kiosk systems, Intermas customers can request kiosk systems as usual regarding their own specifications.

According to Mr. Burkhard Klotz, chief executive of Intermas-Elcom GmbH, "products of Infotronic Touch-screen Systeme GmbH complement the Intermas product range ideally. Kiosk systems put high requirements on electronics and air conditioning, especially outdoor. With its current redevelopment, namely i-Line Shine, Infotronic has proofed its very specific know-how." For Mr. Martin Unger, Infotronic chief executive, the cooperation with Intermas opens up a larger sales market for Infotronic products. Mr. Unger adds: "Intermas-Elcom possesses a strong and well-enlarged sales network in Europe so that now we can provide our products on a much bigger market."

As a specialist for Electronic Packaging, Intermas offers industrial PCs in the form factors 19" computers, wallmount and panel PCs. Intermas encompasses its own development and production department, so each industrial computer can be adapted to custom requirements concerning mechanics and electronics.

Infotronic Touchscreen Systeme GmbH develops and produces infotainment systems based on multimedia technology. Indoor as well as outdoor kiosk systems belong to the sales mainstay.
